1. International trade. Alberta

Message from the Minister

Alberta's impressive export performance in 1990 confirms the province's reputation as a resourceful and reliable supplier of goods and services to the world.

For the fourth consecutive year, the value of Alberta exports rose substantially. The 1990 total of $17.2 billion represents an increase of $2.6 billion over 1989 and reflects growth in both merchandise and service exports.

It is interesting to note that Alberta's success in global markets was achieved in a dramatically changing environment, marked by a move toward more liberalized trade in some regions and political and economic upheaval in others.

The ability to prosper in this volatile trade environment is due in large measure to Albertans' aggressive pursuit of economic diversification. While oil and gas and agricultural products remain major contributors to our export success, each year sees a broader range of value-added products introduced to the international arena. As this trade review reveals, more than 25% of our merchandise exports now consist of manufactured products, including processed foods, forest products, electronics and transportation equipment.

Our service sector, which encompasses everything from tourism to business and engineering services, also adds significantly to Alberta's international trade profile, generating $1.53 billion in export sales in 1990.

As our capacity to supply world demand increases, Alberta exporters have continued to focus on traditional markets such as the United States and Europe, while exploring the enormous potential of emerging markets such as the Asia/Pacific Rim. In 1990, exports to China, alone, were up by more than 70% over 1989 while shipments to Japan, South Korea and Taiwan continued to show solid growth.

Alberta's export community, which now conducts trade with roughly 150 countries worldwide, has once again shown it can succeed in the most competitive markets. Working together, government and the private sector continue to pursue a farsighted export market development strategy designed to expand export trade, diversify markets, and increase the range of Alberta products and services shipped abroad.

Each year, Alberta's most successful exporters are honoured with Export Achievement Awards. These awards are intended as a salute to all Alberta companies, large and small, that have demonstrated their ability to capture markets beyond Alberta. Their efforts are reflected in increased employment (more than 250,000 jobs in Alberta are now linked to international trade) and in a stronger, more diverse provincial economy.

I trust this review of Alberta's 1990 export performance will offer encouragement to Alberta businesses currently eyeing export markets. Alberta Economic Development and Trade invites you to take advantage of the many programs and resources available to help you capitalize on opportunities in an increasingly dynamic global marketplace.

Going Global: Alberta's Export Strategy

The International Trade Arena in Alberta

Albertans have always been traders in the world market, our standard of living and quality of life dependent on our ability to compete in the global arena. In 1990, Alberta's success in international trade was reflected in exports of $17.2 billion, representing over 20% of the province's Gross Domestic Product. Every day of the year, Alberta exported more than $46 million worth of goods and services, as business and industry supplied markets in close to 150 countries around the world.

Exports also provide jobs. Over 250,000 jobs in the province depend directly or indirectly on international trade. With a total labour force of 1.3 million Albertans, this means that one out of every five jobs depends in some way on international trade.

There are other equally important but less visible benefits from exports. International trade is a basic component of economic growth and diversification. Alberta is a relatively small market of 2.5 million people and Alberta business and industries must have access to larger markets if they are to lower costs, expand production, diversify, and achieve their full potential. As they succeed in expanding existing markets and opening up new markets for goods and services, the province's economic base is strengthened and diversified.

The Global Situation

The 1990s are seeing the rapid spread of technological adaptation, the development of strategic alliances, and a growing understanding that intellectual and human resources will become increasingly important to success in the international marketplace. The hallmark of the 1990s will be dynamic competitive shifts among countries and regions, a trend already witnessed two years into the decade. Changes are sweeping across virtually all of Alberta's major markets: the United States, the Asia Pacific Rim, Europe, Latin America, Africa, and the Middle East. Alberta will have to respond quickly to both the challenges and opportunities presented by this new market environment.

North America — implementation of the Canada/U.S. Free Trade Agreement (FTA), which began in January, 1989, will see virtually all tariff and non-tariff barriers eliminated by 1998. Negotiations are well advanced on a North American Free Trade Agreement involving Canada, the United States, and Mexico. If successful, this will result in the largest single market in the world, comprising more than 360 million people and a gross domestic product of over $6 trillion.

Asia/Pacific Rim — with increased political stabilization and rapid economic growth, this region continues to be the Province's fastest growing market.

Europe — the commitment by the European Community to eliminate internal barriers to trade by December 1992 will open up another huge market of over 300 million people and a gross domestic product of $5 trillion. The dramatic changes occurring in Eastern Europe and the Soviet Union will also create new opportunities for Alberta companies.

Latin America/Africa — these two regions are moving toward more democratic institutions. Many of the principal economies in the region have addressed at least some of their international debt problems and are moving forward rapidly, creating opportunities for additional exports from Alberta.

The Alberta Strategy

Alberta has developed a dynamic export sector with a strategy involving initiatives in four areas: trade policy, investment, competitiveness, and trade promotion.

The first pillar, trade policy, involves continuing support for liberalized trade to ensure Alberta exporters have access to major markets. The overriding objective has been to enhance and secure our access to other markets, reducing barriers to trade wherever possible. Alberta's efforts have focused on the Multilateral Trade Negotiations, the Canada/U.S. Free Trade Agreement, and the North American Free Trade Negotiations with Mexico and the United States. These initiatives have allowed Alberta producers to make long-term investment decisions and attract more investment to the Province. That investment, in turn, has allowed the private sector to achieve technological changes and economies of scale which enhance their international competitiveness.

The second pillar revolves around investment and investment policy. Alberta has relied on investment from both Albertans and foreign sources throughout its development. Alberta has maintained an open economy, attracting investment from Albertans, other Canadians, and foreign sources.

Investment generates jobs, favours economies of scale, and encourages technology transfer. However, much of Alberta's investment is based on providing goods and services to a market outside the province and requires the market access provided by our trade policy initiatives.

The third pillar is competitiveness. Alberta's ability to remain competitive will, in large part, be driven by our capacity to compete in international markets for new investment and obtain the market access to expand our exports. If Alberta is to compete successfully in international markets, we will have to continue improving our overall productivity. The Alberta Government has taken a leadership role in improving competitiveness in the areas of provincial and local corporate taxation, regulatory environments, education and training, encouraging innovation and research and development, and in improving business/labour relations.

The fourth pillar revolves around a comprehensive trade promotion strategy. To promote exports from Alberta, Alberta Economic Development and Trade offers major programs designed to assist Alberta businesses. These include:

- Export Trade Readiness for Alberta (EXTRA)
- Transportation Export Services for Trade (TEST)
- Winning Initiatives Through Trade Shows (WITTS)
- Market Development Assistance Program (MDAP)
- Export Loan Guarantee Program, New Exporters to Border States (NEBS)
- New Exporters to U.S. South (NEXUS).

Export Market Development

Alberta's export market development strategy is designed to take advantage of unique opportunities to expand exports in three major regions: North America, the European Community, and Asia/Pacific Rim countries. While opportunities in other sectors or regions are pursued, the focus will be on these three important markets.

The objectives of Alberta's export initiatives are:

- to expand overall export trade;
- to support a rapidly growing and diversifying Alberta economy;
- to diversify markets and increase export market stability for Alberta goods and services;
- to expand the range of products and services exported from Alberta, supporting the diversification of the Alberta economy; and
- to increase the total number of active exporters in Alberta.

North American Market

The Free Trade Agreement with the United States and the negotiation of a North American Free Trade Agreement with Mexico provide the basis for broadening our trade relations with the United States and Mexico. Alberta is continuing to pursue opportunities to further increase and secure our access to the United States and Mexican markets.

Europe

The European Community will become a single market at the end of 1992 with virtually every internal barrier to trade eliminated. This will be the largest trading economy in the world with annual trade of more than $1.5 trillion per year.

Alberta's trade initiatives are designed to assist Alberta companies to penetrate the European Community today and to plan strategies for expanding their market penetration in 1992 and beyond.

Asia/Pacific Rim

This region is responsible for over 40% of the world's trade and 50% of the population. It has the world's most rapidly growing developed market in Japan and five of the fastest growing "new tigers" in South Korea, Hong Kong, Singapore, Taiwan, and Thailand.

Alberta maintains special relationships with Hokkaido in Japan, Gwango in Korea, and Heilongjiang in China. The combination of our long-term relationships with these areas and the rapid growth in the region provides a basis for expanding exports to Asia and the Pacific Rim.

Latin America, Caribbean, Middle East & Africa

Alberta companies will continue to pursue opportunities in these areas, taking advantage of support programs wherever they may be of assistance.

International Trade Review

The Year
In Review

About the Data

This publication is intended to provide a convenient data source for Alberta's international trade in goods. For each country to which Alberta exported at least $1 million in 1990 a full profile of the top 15 exports to that country is presented for both Alberta and Canada. For the remaining countries, a summary of export totals is provided within the final pages of the publication.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS) which was adopted by Statistics Canada in 1988. Since a different system of categorization was in use prior to that period, comparisons on an itemized basis are not reliable.

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, commodity descriptions accompanying these codes may have been revised slightly from their standard format. Readers requiring the exact content of a particular HS number, therefore, are referred to the Tariff Schedule of Canada.

Important qualifications must be noted with respect to Alberta export data to the United States. On January 1, 1990, Canada entered into a Memorandum of Understanding with the United States concerning the exchange of import data. To eliminate the trade data discrepancies between the two countries, Canada and its major trading partner are now using each others' import statistics in place of their respective export data.

This data exchange has resulted in higher export values for most of the commodity categories traded to the United States in 1990 as a result of improved coverage. Consequently, year-to-year comparisons are not reliable. As well, 1990 data for the U.S. include exports to Puerto Rico and the U.S. Virgin Islands. For this publication, prior years' data have been adjusted accordingly.

Regional tables and estimates of exports by industry are also provided in the following sections. In some cases, six-digit HS codes have been combined in order to present more commonly understood commodity descriptions. Examples include wheat, live cattle, pork, wood pulp, lumber, paper and polyethylene.

The table presenting Alberta exports by sector has been constructed using Statistics Canada's "Concordance Between the Canadian Export Classification, 1988 and the Standard Industrial Classification, 1980" with some minor divergences; Statistics Canada, for example, classified peat moss to the mining sector where this publication has allocated the commodity to agriculture and related products. The following table summarizes the system of commodity classification by industry.

Statistics Canada is the primary data source for this publication. However, Alberta Agriculture publishes export statistics for agricultural commodities which more accurately reflect Alberta's contribution to Canada's agricultural production for export. The system is based on HS codes but better allocates exports to their point of origin. On a net basis, Statistics Canada underestimated Alberta's agricultural exports in 1990 by approximately $120 million based on this system.

The term "exports" refers to "domestic exports": goods grown, extracted or manufactured in Alberta or Canada, as the case may be, and includes goods of foreign origin which have been materially transformed in Alberta/Canada and then exported.

Unfortunately, service exports cannot be included on a country-specific basis, as such data are not presently available. Total service exports (including tourism) have, however, been provided in the following "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

The Year in Review

Major events continued to shape the global trading environment in 1990. These include:

- political unrest in some countries and restructuring in others;
- the Persian Gulf crisis;
- the prospects of a North American Free Trade Agreement, the dismantling of trade barriers in Europe by 1992, and ongoing Multilateral Trade Negotiations;
- increasing worldwide concern with the environment; and
- continuing implementation of the Canada-U.S. Free Trade Agreement.

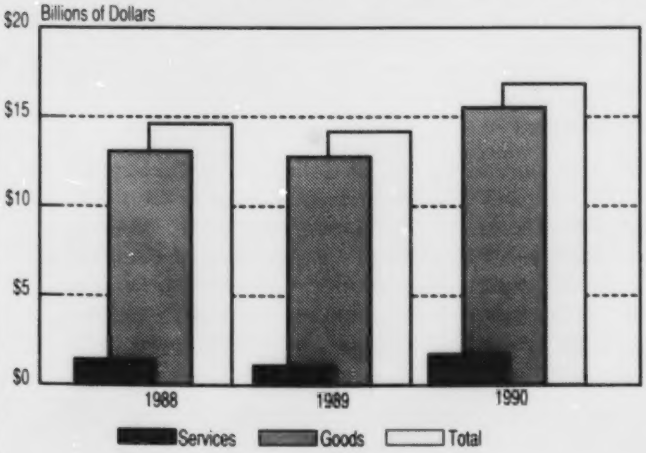
Within this framework, the value of world trade (on an export basis) increased, according to the International Monetary Fund, by 13.9% in 1990 compared to 1989 to a level of $3.3 trillion (U.S.).

Alberta, as part of this trading environment, shared in the expansion of export activity. Merchandise exports increased from $13.05 billion in 1989 to $15.74 billion in 1990 with growth registered in traditional markets such as the United States and Europe along with continued penetration in rapidly emerging areas such as the countries and regions of the Asia-Pacific Rim.

International trade remains a vital element of Alberta's overall economic performance with exports accounting for more than 20% of the province's Gross Domestic Product. Over a quarter of a million Albertans were employed both directly and indirectly as a result of international trade.

Recognizing the significant economic contribution of trade, Alberta continued to support the liberalization of global markets in 1990. Implementation of the Canada-U.S. Free Trade Agreement, while continuing to be a priority, was only a starting point. Significant efforts have been directed to securing more broadly based market access through the Uruguay Round of Multilateral Trade Negotiations. Most of Alberta's major trading partners are among the more than 100 countries involved in this process. Complementing this world view are the efforts which have been focused on North American Free Trade Negotiations.

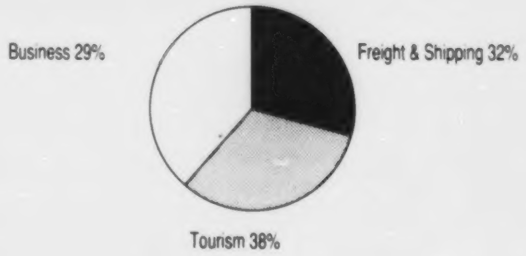
TOTAL GOODS AND SERVICES EXPORTS



The importance of these efforts is apparent when measured against the volume of Alberta's trade and its relative market diversity. Alberta exported to nearly 150 countries in 1990 with more than one quarter of total sales accounted for by manufactured products. On a regional basis, merchandise sales increased to Asia, Eastern and Western Europe, Africa, and South America. Exports increased in most sectors as well, including logging and forestry, agriculture, mining, food and beverages, and electrical and electronic equipment.

Service exports were also an important element of Alberta's overall export performance. Valued at approximately $1.53 billion, service exports brought the total value of Alberta's exports to $17.2 billion in 1990, an almost $3 billion increase over the $14.6 billion total trade figure registered in 1989. Tourism remained the major service export accounting for 38%, or $587 million, of total service exports. Business services exports, which range from management consulting to computer and engineering services, accounted for 29% of the province's service exports in 1990 while freight and shipping is estimated to have taken the remaining 32% share.

ALBERTA SERVICE SECTOR EXPORTS, 1990



Alberta Exports by Commodity

The total value of Alberta's commodity exports in 1990 was $15.7 billion, a 20% increase over the value recorded in 1989. Concentrated in shipments related to mining activity — which accounted for 57% of total value — trade was nonetheless spread across a variety of sectors. Agricultural products, both primary and processed, accounted for 17% of all export revenue. Manufacturing exports as a whole increased by 6.1% over 1989 and accounted for 27.5% of total value. Commodity shipments within the manufacturing category were diversified ranging by industry from plastics to clothing and by product from wood pulp to telephone sets.

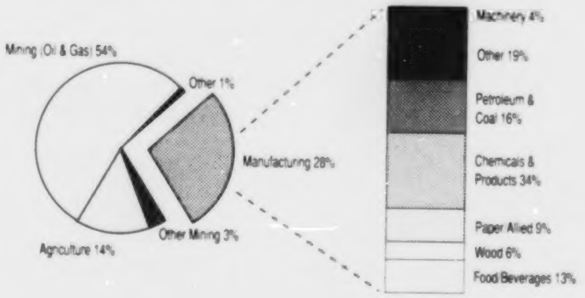
ALBERTA'S EXPORTS BY SECTOR, 1990



Mining

Alberta's mining exports amounted to $9,063.0 million in 1990, an increase of 24.9% over 1989. Crude petroleum and natural gas shipments accounted for 87.3% of the industry's export revenue.

Valued at $5,289.6 million, crude petroleum was the most important commodity in the industry. Shipments increased by 54.4% over values registered in 1989. Most of this revenue was generated in late 1990 as oil prices rose in response to uncertainties created by the Persian Gulf crisis. Gains were not entirely attributable to increased values, however; export volumes also increased, rising by 16.5% over 1989. As in previous years, almost all oil shipments (99%) were bound for the U.S. market. On a relative basis, however, shipments to Japan were up more than three fold over 1989.

Natural gas exports declined moderately in 1990, losing 5.1% of the $2,766 million earned in 1989. Export volumes also declined from 34.3 billion cubic metres shipped in 1989 to 31.3 billion cubic metres in 1990, largely the result of depressed demand and stronger production within the United States.

Alberta accounted for 96% of Canada's sulphur exports in 1990. At $607.3 million, export revenue from the commodity increased by 12.3% compared to 1989. Morocco has traditionally been Alberta's largest market for sulphur and, though exports to the country increased significantly in 1990, the United States represented the top market. Significant amounts of sulphur were also shipped to 24 other countries.

Exports of coal, valued at $509.6 million in 1990, increased over 1989 values by a moderate 4.8%. Japan remained the major market for Alberta coal, accounting for 72% of export revenue. However, exports to Japan declined slightly in

1990. Much of the overall gain was attributable to increased, though relatively minor, shipments to Italy.

Though in lesser quantities than the major mining commodities, exports of products such as barium sulphate, gravel aggregates, salt, and graphite also increased in 1990.

ALBERTA'S MAJOR MINING EXPORTS
(All Mining) **($000s)**

	1989	*1990*	*Percent Change*
Crude Petroleum	3,426,433	5,289,630	54.4
Natural Gas	2,765,956	2,623,908	-5.1
Sulphur	542,174	607,349	12.0
Coal	486,320	509,648	4.8
Potassium Chloride	31,674	11,618	-63.3
Total Above	**7,252,557**	**9,042,153**	**24.7**
Total All Mining	**7,255,865**	**9,063,039**	**24.9**

Agriculture and Related

Including both primary and processed products, the total value of Alberta's agricultural exports in 1990 was $2,692.2 million, an increase of close to 30% over values recorded in 1989. Primary products accounted for 13.6% of all exports in 1990 while manufactured food, beverage, and tobacco products added another 3.5%.

Significant increases occurred in exports of wheat, pork, live cattle, whisky, and raw hides and skins. Substantial decreases were posted, however, in shipments of hogs, oats, seeds for sowing, and oilseed cake and meal.

Wheat exports, valued at $1,037.7 million, increased 81% from values recorded in 1989 and remained, by far, Alberta's most significant agricultural export commodity, accounting for almost 39% of total agricultural export revenue. The 1990 increase marked a return to more normal export levels following a severe drop in shipments to the U.S.S.R. and China in 1989.

Live cattle exports increased by 73.1% over the value of $146.6 million recorded in 1989. The gain was attributable to a sharp rise in sales volume brought about by relatively high demand and prices in the United States.

Barley exports increased by a moderate 5.4% while the value of oat exports declined to $52.2 million in 1990 from the $87.6 million recorded in 1989. Canola seed exports also declined, dropping by $24 million to a 1990 total of $229.7 million.

Although beef exports declined by 3.7%, shipments of pork rose by 148% in 1990 to $84.9 million.

Overall, processed agricultural product exports increased by 17.7% in 1990 compared to 1989, with gains posted in products as diverse as milk powder, refined sugar, wheat bran, yeast, cashew nuts, and mineral waters.

ALBERTA'S MAJOR AGRICULTURAL EXPORTS
(Includes Food & Beverage Manufacturing) **($000s)**

	1989	*1990*	*Percent Change*
Wheat	572,997	1,037,746	81.1
Barley	291,105	306,934	5.4
Live Cattle	146,630	253,814	73.1
Canola Seed	253,774	229,654	-9.5
Raw Hides & Skins	95,830	116,150	21.2

Total All Agriculture	**2,081,117**	**2,692,241**	**29.4**

Forestry

Forestry and related products exports amounted to $659.6 million in 1990, a decline of 10% compared to 1989 values. While the primary portion of the industry (producing raw logs and fuel wood) fared well, the wood products and paper and allied manufacturing components posted declining export values associated with a cyclical downturn in prices.

Wood pulp, the most significant export commodity in the industry, generated $376 million in international sales, but the value represented a 13.4% decline from the level recorded one year earlier. Almost 80% of the product, a significant but declining portion, was shipped to the United States. Alberta shipped an additional $29.5 million of wood pulp to Japan with the remainder destined for another 20 countries.

Lumber exports, primarily softwood coniferous valued at $171.2 million, were the second highest valued forestry export commodity and, against the industry trend, shipments increased by 1.2% in 1990. Though exported in modest quantities, shaped hardwood lumber exports increased by a robust 342% over the two-year period. The U.S. market was the destination for more than 90% of Alberta's lumber exports, but shipments were negatively affected by a downturn in construction activity in the North American market generally and the 15% export tax on softwood lumber imposed by the federal government.

Exports of both particle board and fibre board declined in 1990 compared to 1989, by 28.3% and 7.4%, respectively. Exports of paper and paper products, while accounting for a modest 1.6% of the forestry industry's exports, increased by 10.5% in 1990 to post export revenues of $10.5 million.

ALBERTA'S MAJOR FORESTRY EXPORTS (Includes Wood Products and Paper & Allied Manufacturing) ($000s)

	1989	1990	Percent Change
Wood Pulp	434,008	376,016	-13.4
Lumber	169,270	171,230	1.2
Particle Board	90,652	65,038	-28.3
Fibre Board	17,507	16,213	-7.4
Paper, Paper Board, & Paper Products	9,494	10,493	10.5
Total Above	**720,931**	**638,990**	**-11.4**
Total All Forestry	**733,228**	**659,554**	**-10.0**

Manufacturing

Alberta's exports of manufactured products, valued at $4,332.1 million in 1990, increased by 6.1% over 1989, though the industry represented a smaller share of total export value. Gains by sub-industry were broadly based with only the plastics, chemicals and chemical products, wood, and paper and allied products industries posting declines. Exports of the clothing, furniture, primary and fabricated metals, and other industries all increased appreciably.

Machinery

Machinery exports, excluding electrical and electronic and transportation equipment, increased by 4.4% in 1990 and, at $175 million, accounted for slightly more than 1% of total export revenue.

Though machinery related to the mining industry had the highest export value, commodity shipments were varied, with the five main commodities accounting for only 42% of the industry's export revenue. Commodities posting impressive gains included compressors, hydraulic power engines, parts of laboratory furnaces, ball bearings, and pulp-making machinery.

ALBERTA'S MAJOR MACHINERY EXPORTS (Excludes Electrical & Transportation Equipment) ($000s)

	1989	1990	Percent Change
Parts of Boring or Sinking Machinery	17,267	24,130	39.7
Selfpropelled Boring or Sinking Machinery, nes	6,222	16,423	164.0
Compressors (i.e., for refrigerating equipment)	110	12,969	11,690.0
Air or Gas Compressors, Hoods	12,285	10,533	-14.3
Parts of Cranes & Other Construction Machinery	15,024	9,567	-36.3
Total Above	**50,908**	**73,622**	**44.6**
Total All Machinery	**167,191**	**174,596**	**4.4**

Electrical & Electronic Equipment

The industry's export revenue increased in 1990 by 33.2% over values earned in 1989 and the share of overall export value increased slightly. Both gains are encouraging especially given the generally slow market and the importance of the industry to Alberta's international competitiveness.

Transmission apparatus was the highest valued export product in the industry. Shipments valued at $55.3 million went almost entirely to the United States. Exports of telephone sets totalled $49.1 million or 41% of all Canadian exports of the product. Alberta shipped telephone sets to more than 50 countries with more than 400,000 units going to the United States.

Alberta exported five varieties of electronic integrated circuits and micro-assemblies and their parts. In all, these exports were valued at $24.7 million, a more than two fold increase over values shipped in 1989. Growth was especially strong in shipments of digital monolithic and hybrid integrated circuits, the former exported primarily to the United States and South Korea and the latter exclusively to the United States.

Exports of optical fibre cables also increased phenomenally, expanding from a negligible amount in 1989 to $6.76 million in 1990, almost one third of total Canadian exports of the product. The cable was destined entirely for the United States.

ALBERTA'S MAJOR ELECTRICAL & ELECTRONIC EQUIPMENT EXPORTS ($000s)

	1989	1990	Percent Change
Transmission Apparatus for Radiotelegraph Incorporating Reception Apparatus	34,522	55,297	60.2
Telephone Sets	35,325	49,115	39.0
Parts for Transmission & Related Apparatus	43,869	44,477	1.4
Telephonic or Telegraphic Switching Apparatus	21,442	29,461	37.4
Parts of Electrical Apparatus for Line Telephone or Telegraphy	26,817	23,006	-14.2
Total Above	**161,975**	**201,356**	**24.3**
Total All Electrical/Electronic	**222,137**	**295,878**	**33.2**

Refined Petroleum and Coal Products

Refined petroleum and coal products accounted for slightly more than 4% of total exports in 1990 and, valued at $684.2 million, increased by 32% compared to 1989.

Liquefied propane, accounting for 43% of the industry's exports, was the top-ranked product, generating $294.8 million in export sales, nearly a 50% increase over 1989 values. All of the product was shipped to the United States.

Increasing by 74% in 1990 compared to 1989, exports of petroleum oils (other than crude) amounted to $171.1 million. Exports of liquefied butanes declined by 15%.

ALBERTA'S MAJOR REFINED PETROLEUM & COAL PRODUCTS EXPORTS ($000s)

	1989	1990	Percent Change
Propane, Liquefied	196,912	294,771	49.7
Petroleum Oils Other Than Crude	98,426	171,132	73.9
Butanes, Liquefied	173,745	147,694	-15.0
Petroleum Gas, Liquefied, nes	51	30,851	60,392.2
Ethylene, Propylene, Butylene, Butadiene, Liquefied	26,711	18,155	-32.0
Total Above	**495,845**	**662,603**	**33.6**
Total All Petroleum/Coal Products	**518,516**	**684,202**	**32.0**

Chemicals & Chemical Products

The products of this industry accounted for the largest share of manufactured exports. Generating $1,467.2 million, chemicals and chemical products earned more than 9% of total export revenue.

At a value of $430.8 million, polyethylene was the largest export earner in the industry. Alberta's sales represented two thirds of the total Canadian value of polyethylene exports. The product was shipped to 42 countries with the main markets represented by the United States, China, Australia, and Indonesia.

Exports of ethylene glycol declined by 5.7% in 1990. The decline resulted largely from reduced exports to Alberta's two major markets for the commodity, South Korea and the United States, but was somewhat moderated by expanded shipments to Taiwan, China, and Indonesia.

Exports of styrene declined more appreciably despite the maintenance of a strong market in Japan, the destination for one third of the $179.6 million exported in 1990. Modest increases in shipments to that market, combined with strong growth in Thailand and Hong Kong, were not sufficient to offset a substantial decline in exports to the other three markets (South Korea, the United States, and Taiwan).

ALBERTA'S MAJOR CHEMICALS & CHEMICAL PRODUCTS EXPORTS ($000s)

	1989	1990	Percent Change
Polyethylene	378,009	430,793	14.0
Ethylene Glycol(Ethanediol)	204,135	192,576	-5.7
Styrene	276,377	179,582	-35.0
Urea	112,316	162,772	44.9
Methanol(Methyl Alcohol)	182,493	114,866	-37.1
Total Above	**1,153,330**	**1,080,589**	**-6.3**
Total All Chemicals/Products	**1,569,435**	**1,467,249**	**-6.5**

Alberta exports of urea, accounting for more than half of total Canadian international sales, increased by 50% in 1990. This activity was fuelled by strong growth in the United States, a market accounting for 75% of Alberta export sales of the product.

Other Manufacturing

As a group, the remaining manufacturing industries' exports increased by 25% in 1990 compared to 1989 with especially strong growth registered in the clothing and non-metallic mineral products categories. Only the plastics industry posted declines.

From the textiles industry, artificial filament tow proved to be the highest valued commodity in the group, expanding by $13.5 million over 1989 to record a value of $79.7 million exported in 1990. The textiles industry as a whole registered a 14.3% increase in export value over the two-year period.

The value of prefabricated buildings exported (classified to the fabricated metals industry) increased by more than two fold over 1989. Eighty percent of these structures, by value, were shipped to the United States with sizeable values also going to Japan and Saudi Arabia.

Exports of gas-powered trucks with a gross vehicular weight greater than five tonnes amounted to $22.1 million in 1990, a 3,000% increase over 1989. Exports of transportation equipment as a whole amounted to $92.9 million, an increase of 15.1% over 1989.

ALBERTA'S MAJOR OTHER MANUFACTURED PRODUCTS EXPORTS ($000s)

Alberta Exports by Country and Region

During a year of historic political and economic restructuring in several parts of the world, Alberta managed to maintain a strong global trade profile, exporting to 146 countries (including the united Germanies and Yemens). The United States remained, by far, Alberta's major export market, accounting for almost three quarters of total revenue.

ALBERTA'S 10 LARGEST EXPORT MARKETS ($000s)

	1989	*Percent of Total*	*1990*	*Percent of Total*	*Percent Change 90/89*
United States	9,554,798	73.2	11,701,380	74.3	22.5

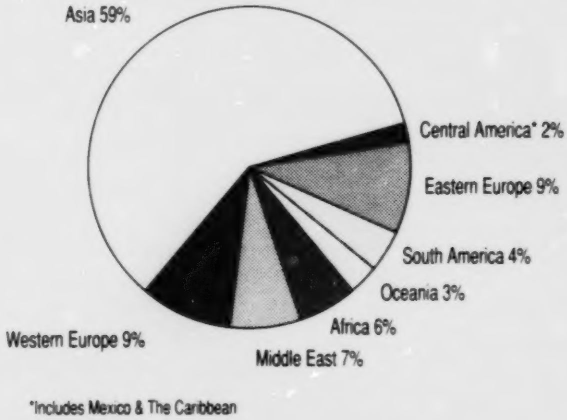
Non-U.S. markets continued to play an important role in absorbing Alberta's commodity exports. Asia was Alberta's second largest regional market with Japan, China, South Korea, and Taiwan representing the major destinations for shipments in the region.

EXPORTS TO NON-U.S. MARKETS, 1990



*Includes Mexico & The Caribbean

Exports to Western Europe increased by 11.6% in 1990 compared to 1989. This continued to be one of Alberta's most strongly diversified markets with 16 countries receiving commodities valued at more than $1 million each. Exports to Eastern Europe nearly doubled in 1990 with particularly strong growth in shipments destined for the U.S.S.R.

Exports to the Middle East were off slightly in 1990 declining by a moderate 1.4%. Losses were attributable, in part, to declining shipments of barley to Saudi Arabia and the embargo on exports to Iraq during the last four months of the year.

Exports to Africa increased by 51% while shipments to South America were up 17.2%. Revenues earned in Oceania and Central America were both down over the two-year period, by 8.2% and 23.4% respectively.

ALBERTA EXPORTS BY REGION ($000s)

	1989	*Percent of Total*	*1990*	*Percent of Total*	*Percent Change 90/89*

United States

Note: While shipments of many products to the United States increased in 1990 compared to 1989, changes to the data collection methodology in 1990 resulted in improved data capture and higher value estimates due to the inclusion of freight charges in the valuation process. This skews comparisons of 1990 export values to the United States with data from previous years.

Alberta exports to the United States amounted to $11,701.4 million in 1990. The value represented an 11.1% share of total Canadian exports to the United States, compared to the 9.7% portion captured in 1989.

Crude petroleum was the third largest Canadian export to the United States in 1990 and almost all of the $5,470.6 million shipped was Alberta crude. Together, oil and gas exports valued at $7,862.8 million accounted for 67% of Alberta's commodity exports to the U.S.

All of Alberta's $294.8 million in liquefied propane exports were shipped to the United States. Slightly more than

70% of all Canadian liquefied propane exports originated in Alberta.

Alberta exports of the petrochemical polyethylene (all kinds) to the United States amounted to $308.9 million, or 71.7% of Alberta's international polyethylene market. Exports of styrene to the United States, at $20 million, slipped out of the top 15 commodities but other petrochemicals such as urea, anhydrous ammonia, and methanol remained or were added to the list.

The United States remained Alberta's largest market for wood pulp, taking an almost 80% share of the value of the commodity's export earnings, or $299 million. Led by softwood coniferous, exports of lumber to the United States in 1990 were valued at $161.5 million or 94.3% of Alberta's foreign market for the product.

The United States also remained the most significant customer for Alberta's agricultural exports — in the aggregate, $756.7 million of commodities. In particular, exports of pork rebounded following persistent problems in the packing industry combined with difficulties arising from countervailing duties. Beef and cattle exports also showed signs of improvement.

Asia

As a whole, the Asia/Pacific Rim market was the destination for $2,394.0 million, or 15.2%, of Alberta's commodity exports. Export revenue generated in the region increased by 12.4% in 1990 compared to 1989.

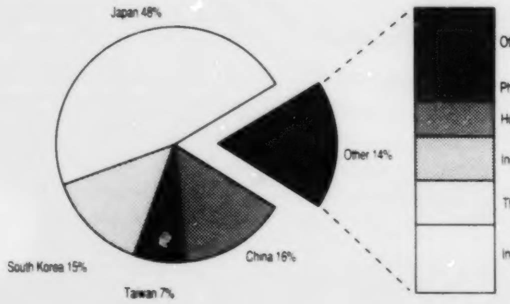
Japan, Alberta's second largest export market overall, accounted for 7.4% of Alberta's total international trade and for 48% of the value within the Asian region itself. Exports rose moderately, however, increasing by only $17.5 million in 1990 over 1989.

Bituminous coal remained the largest export to Japan, valued at $365.1 million. At the same time, Japan represented Alberta's most significant international market for this kind of coal. In total, agricultural exports to Japan were estimated at $577.5 million compared to $528.6 million in 1989. Rape or colza (canola) seed was the most significant commodity exported, ranking second overall at a value of $223.7 million. Wheat and barley exports also improved. Japan was Alberta's largest international market for styrene, taking a 32.5% market share by value, and the second largest market for methanol exports, accounting for almost 40% of the total value of the commodity exported.

China replaced South Korea as Alberta's second most significant market in the Asia/Pacific Rim region in 1990 with the value of exports to the People's Republic increasing more than 70% over 1989. Most of the gain was attributable to an almost $200 million increase in exports of wheat. The increase represented the return to more normal levels of wheat exports to China following an appreciable drop in 1989.

ALBERTA EXPORTS TO ASIA, 1990



Exports to South Korea increased by slightly less than 2% in 1990 — to $357.2 million. The country was Alberta's second largest market for bituminous coal, receiving $83.1 million of the Alberta product. Following a large increase in 1989, exports of ethylene glycol stabilized at nearly $73 million, 82.3% of the total Canadian value of the product shipped to South Korea. Exports of styrene declined appreciably.

Taiwan was Alberta's sixth largest single-country market overall. At $159.1 million, the total value of exports to the country increased by 14.2% in 1990 over 1989, one of the higher rates of growth among the major markets in the Asian region. Although Taiwan remained a substantial market for Alberta petrochemicals, bovine hides replaced styrene as the top-ranked commodity in 1990.

Western Europe

On a regional basis, Western Europe was Alberta's third largest export market with total exports increasing by 11.6% in 1990 over 1989 to a level of \$369.8 million.

At \$73.5 million — an increase of 28.6% over 1989 — the United Kingdom replaced the Netherlands as Alberta's top export market within the region. The gain was due less to spectacular increases in single commodity categories than to a general improvement in a wide variety of exports. Wheat, cobalt, lumber and wood pulp, and several categories of electronic equipment, for example, all posted healthy increases.

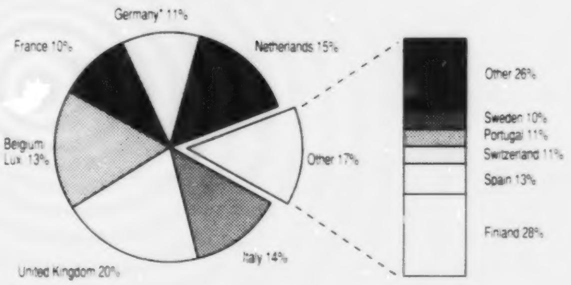
*Includes both East & West Germany

Although declining from \$79.4 million in 1989 to \$56.2 million in 1990, exports to the Netherlands remained an important portion of trade activity in the region. Much of the decline resulted from a reduction in exports of certain petrochemical products including vinyl acetate, styrene, and methanol.

ALBERTA EXPORTS TO WESTERN EUROPE, 1990



*Includes Both East & West Germany

With exports of bituminous coal up almost four fold in 1990 over 1989, Italy became the third highest Alberta export market in the Western European region. Overall export revenues to the country increased by 39% over the two-year period.

Exports to Belgium/Luxembourg declined by \$4.4 million in 1990 with gains in some agricultural product exports such as wheat not quite sufficient to offset losses in others, including linseed, peas, and mustard seed. Despite a significant increase in exports to Germany of semi-chemical wood pulp, total export values declined by slightly more than \$2 million in 1990.

Eastern Europe

Posting a 98% increase in value in 1990, Eastern Europe was Alberta's fastest growing export market. Much of the increase was attributable to expanded exports of wheat destined entirely for the U.S.S.R., and of barley destined for the U.S.S.R. and Romania.

ALBERTA EXPORTS TO EASTERN EUROPE ($000s)

	1987	*1988*	*1989*	*1990*

The U.S.S.R. was, by far, the largest market in the region accounting for 96.4% of the Eastern European total. Increased exports of the major agricultural products more than offset fairly substantial declines in exports of sulphur to the U.S.S.R. in 1990.

Exports to Romania also increased substantially and, although dominated by barley exports, included a much wider range of commodities than was sold to the nation in 1989.

Exports to all other countries in the region, except Hungary, declined in 1990 compared to 1989.

Middle East

Exports to the region were off slightly, declining from $296.8 million in 1989 to $292.6 million in 1990. This was attributable primarily to declining export sales to Saudi Arabia and Iraq.

Saudi Arabia remained the largest market for Alberta in the region, taking $98.4 million, or one third of the total Middle East value. However, the 1990 figure represented a decline of 15% over the value recorded in 1989. The drop was due almost entirely to reduced exports of barley which managed to offset export gains in wheat and of certain electronic and wood products.

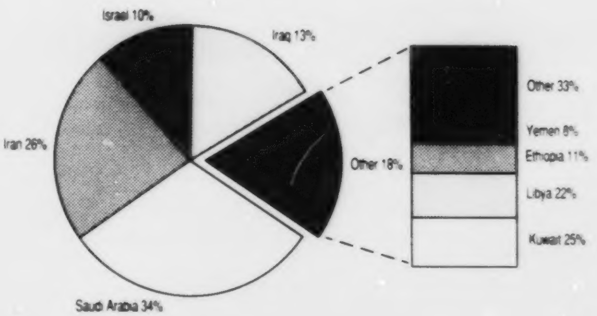
*Includes both North & South (Democratic) Yemen

Iran, posting a 24.1% increase in export values, was Alberta's second largest market in the Middle East in 1990. Much of the gain arose from a $13 million increase in shipments of wheat and meslin and a similar increase in sales of refrigerating equipment compressors. Exports of barley declined by more than half.

ALBERTA EXPORTS TO THE MIDDLE EAST, 1990



Alberta's exports to Iraq declined by $30 million in 1990 to a level of $39.4 million. The decline was almost entirely attributable to reduced shipments of wheat and barley.

Exports to Israel increased by 14% with gains broadly based across a variety of commodities. Exports to Kuwait increased appreciably in 1990 compared to 1989, rising from less than $1 million to nearly $13 million. The bulk of the increase originated with exports of wheat and barley.

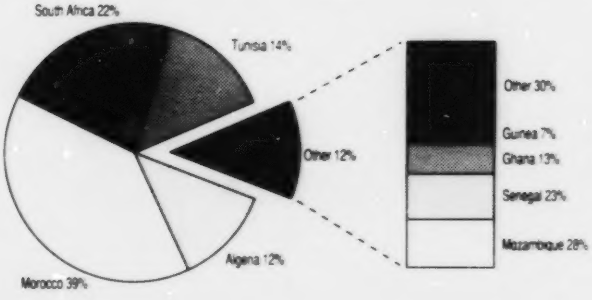
Africa

Exports to Africa in 1990 increased by nearly $80 million or 51%, the second highest rate of growth among regions.

With exports of sulphur more than doubling in 1990 over 1989, Morocco regained its position as the main African market for Alberta's commodity exports, accounting for almost 40% of the region's total value. Although sulphur dominated commodity exports to the country, gains were more broadly based with sales improving in products such as wheat, telephone sets, and other electrical and electronic equipment.

ALBERTA EXPORTS TO AFRICA, 1990



Exports to South Africa increased by nearly $11 million to a total of $51.2 million in 1990 over 1989. The gain was attributable almost entirely to sales of wheat and meslin, neither of which had been exported to South Africa in 1989. Declines in other commodity exports, however, somewhat diluted the $23 million increase in shipments of the agricultural product.

Tunisia, generating $34 million in sales for Alberta exporters, was the third largest market in the region. Exports to the country were heavily concentrated in sulphur, sales of which increased by nearly $13 million. Exports to Algeria increased by 33.7% to $29.3 million in 1990, due largely to increased sales of wheat.

Although Brazil remained the main market, generating $82.6 million in commodity sales and ranking as the tenth largest market overall, exports to that country declined by 13.6%. The drop was the result of reduced sulphur exports and, to a lesser extent, declining sales of coal. Wheat exports, however, increased by more than $6 million, and barley and certain other agricultural products also posted gains in sales.

The shortfall created by exports to Brazil was more than compensated for by increasing purchases by Colombia, Venezuela, Peru, and Argentina. Exports of wheat to Colombia more than doubled while exports of the product to Venezuela increased more than five times. Sales of sulphur and certain electronic products to Argentina increased appreciably as did shipments of contractor's equipment and wood pulp to Peru.

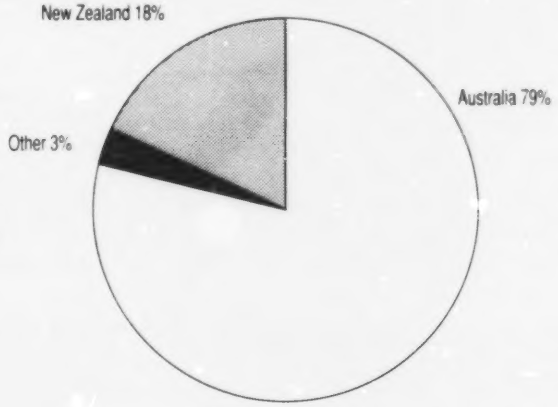
Australia accounted for nearly 80% of this value and, generating export sales of $89.7 million, was Alberta's ninth largest export market overall. Although exports of manufactured products such as urea, polyethylene, and air and gas compressors increased appreciably, declining sales of the top-ranked product — sulphur — contributed to an overall drop of almost $12 million compared to 1989.

ALBERTA EXPORTS TO OCEANIA, 1990



Although sulphur exports to New Zealand increased slightly in 1990, total sales to the country declined by $1.2 million over 1989 to a level of $20.3 million. Exports of polyethylene and certain agricultural products increased in value, but top-ranked products in 1989 such as ammonium sulphate and pentaerythritol failed to register in the top-15 list in 1990.

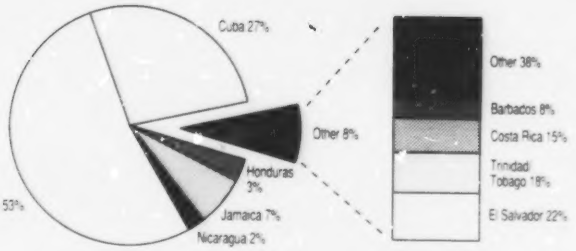
Mexico was the largest market in the region, a destination for $50.8 million of Alberta export sales or 53% of the regional market in 1990. This value, however, represented a decline of $21.6 million from the total value registered in 1989. Though exports of several agricultural products such as milk powder, kidney beans, wheat, and hams were up over the two-year period, substantial declines in sales of canola seed combined with a $5 million reduction in sulphur exports contributed to the overall decline.

ALBERTA EXPORTS TO CENTRAL AMERICA, MEXICO AND THE CARIBBEAN, 1990



Cuba was Alberta's main Caribbean market, receiving $23 million in Alberta wheat, an increase over 1989. Exports to Jamaica, at $6.8 million, ranked third although the value represented more than a 50% decline from 1989.

In Central America, Honduras, a single commodity market was the destination for $2.8 million worth of Alberta urea in 1990, while Nicaragua received agricultural products valued at $2.3 million, representing a nearly three fold increase over 1989.

In Alberta, Canada environmental protection is more than a philosophy.

It's our business.

In Alberta, economic development has always been balanced by environmental responsibility. Twenty years ago, Alberta created Canada's first provincial department of the environment. Since then, our philosophy of environmental protection has become a thriving business.

Applying the engineering expertise we've developed in our traditional industries like energy, Alberta companies have become world leaders in environmental protection technologies, products and services. Alberta companies are in the business of recycling, disposal of hazardous wastes, pollution control and many other areas.

Find out for yourself how the environment can benefit when philosophy and business meet. Contact Alberta Economic Development and Trade today.
